

## WHAT WE DO?

LOAD BANK TESTING & RENTAL

## WHY ?

Over time, lightly loaded generator sets develop wet-stacking and carbon buildup in the combustion chambers and exhaust system, which can lead to increased oil and fuel consumption and poor engine performance. Therefore, periodical load bank testing helps prevent this and determines the generator's capability to produce maximum output in terms of amperage and horsepower.

## WHAT WE CAN DO?

Seatech Engineering Maintenance Sdn Bhd has a in-house load banks. We use these load banks for all our in-house testing and maintenance and also rental services to other clients.

We use data-log recording for a complete and clear report.

## THINK, WE CAN WORK TOGETHER ?

Lot 32A-22, KKIP Ready Built Factories, Phase 2
